

CLEAR SPEND

ClearSpend

Your taxes. Your right to
know.

Budget Intelligence Platform for Every Indian Citizen

Government budgets are public. But nobody can read them.

Dense PDFs

Thousands of pages of bureaucratic jargon no citizen can interpret.

Zero Accountability

Allocations are published. Actual spending is hidden.

Civic Disengagement

Citizens pay taxes but have no window into where the money goes.

"India's Union Budget 2024 is 4,000+ pages long. How many citizens read it? Zero."

ClearSpend – A Civic Mirror for Every Rupee

We turn raw government budget PDFs into an interactive, queryable accountability platform that any citizen can use in minutes.

Upload PDF

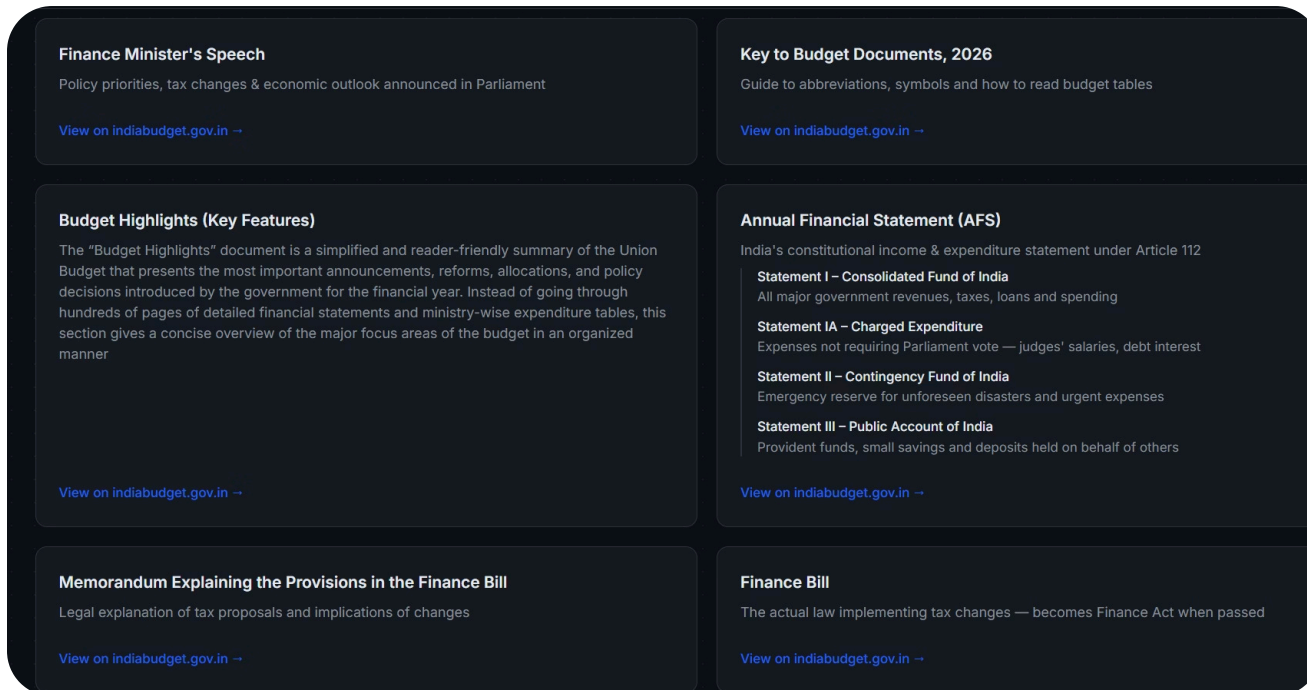

AI Extracts

Visualize Budget

Ask Questions

From raw PDF to real accountability – in under 5 minutes.

Start with the real data. We show you where to get it.

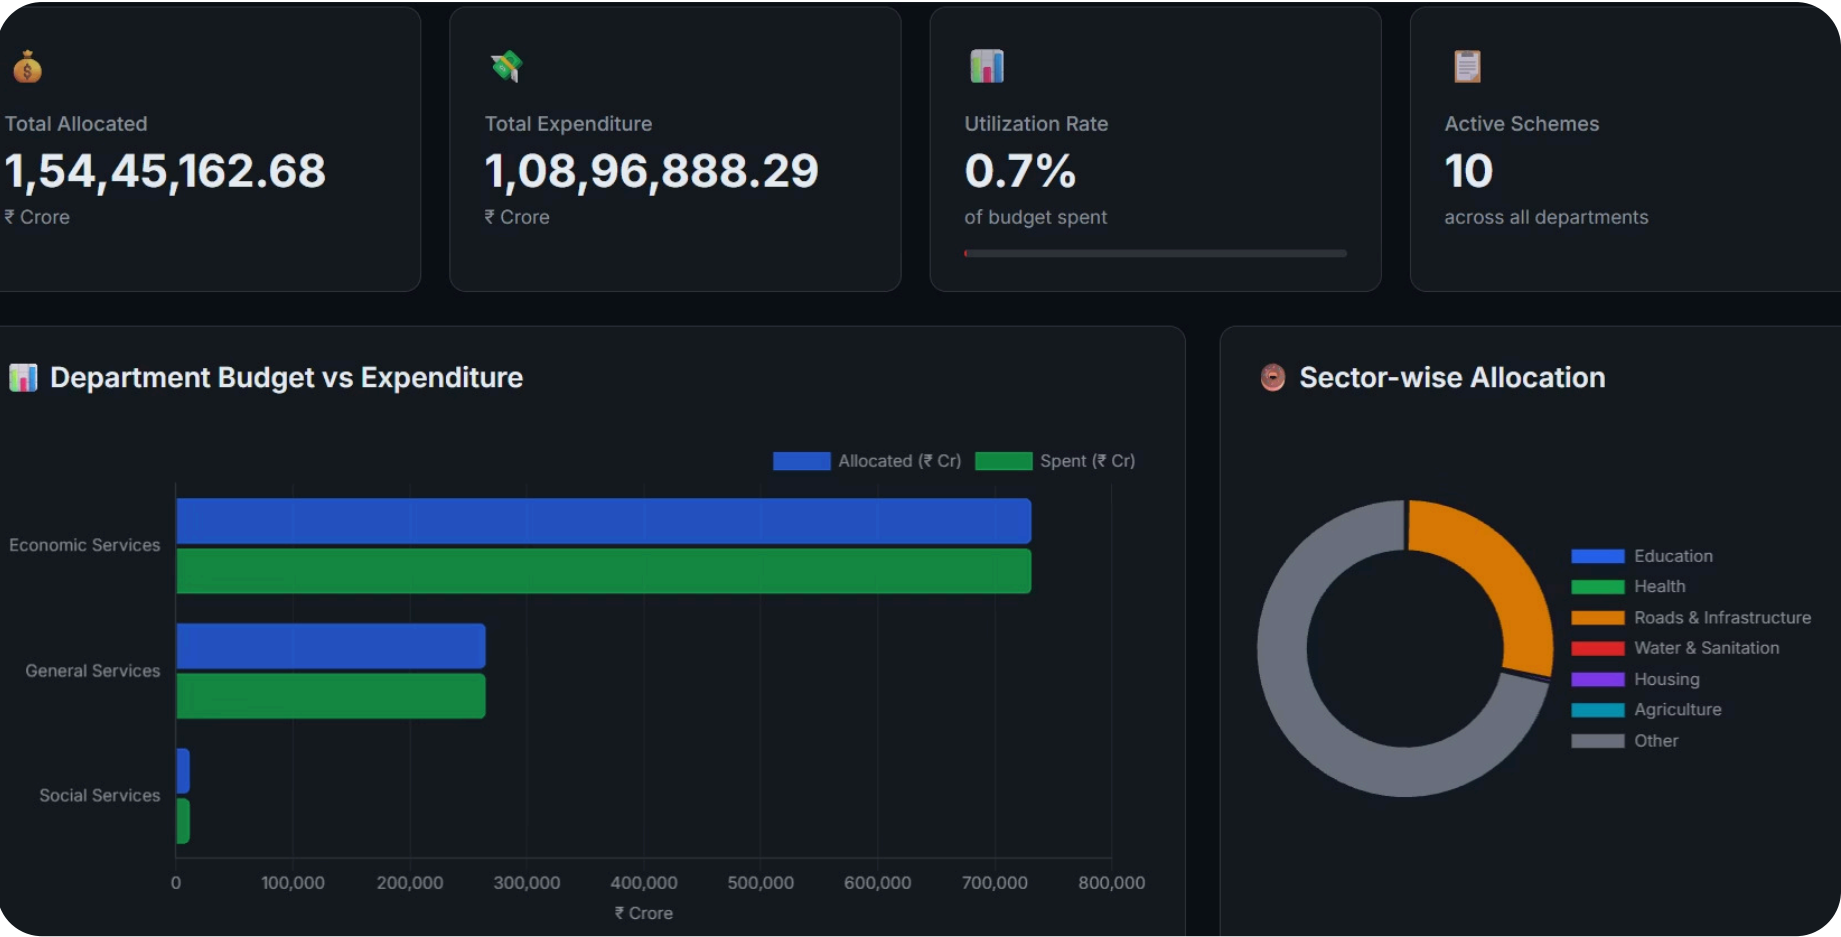

Official Source Navigation

- indiabudget.gov.in — Union Budget portal
- Municipal corporation budget pages
- State finance department portals

User pastes or uploads their downloaded PDF directly into the platform.

  **PDF parsed locally.** Only extracted text is sent to AI — your data never leaves your device.

From 4,000 pages to 4 insights – in seconds.

Every government scheme from the budget – in one searchable table.

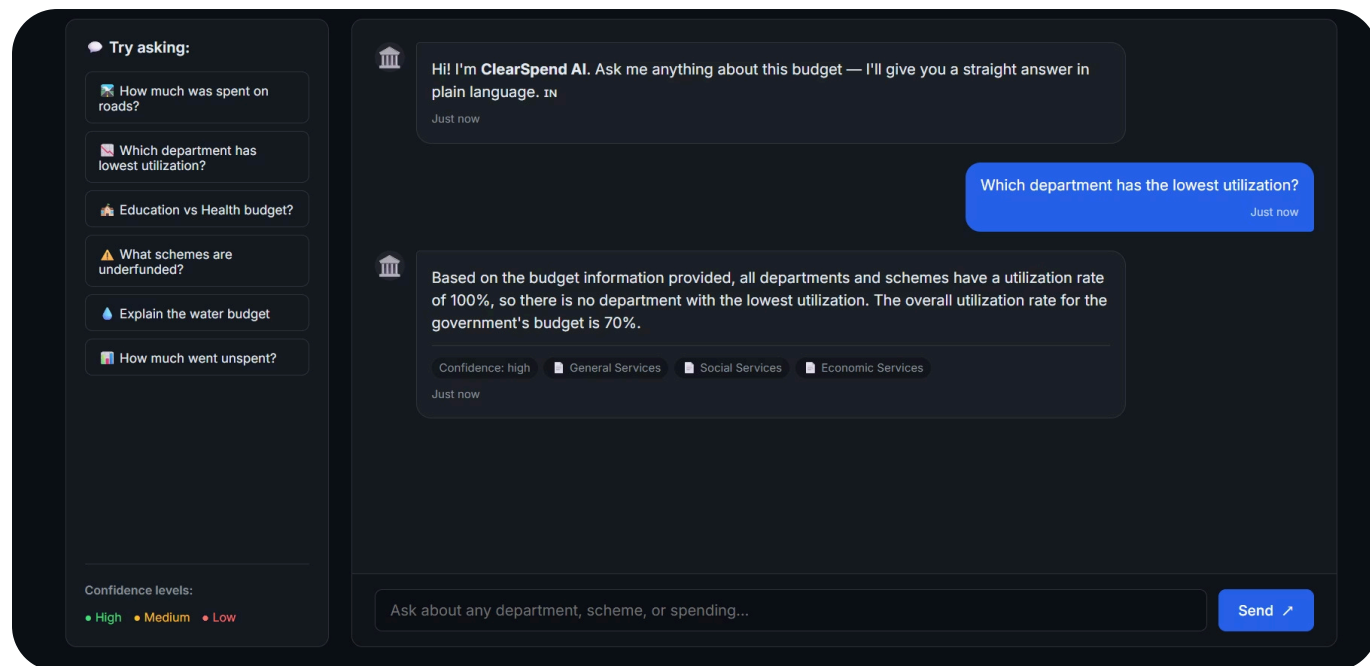

See what was **allocated** vs what was actually **spent**, with a live utilisation bar and a clear **On Track / Delayed** status badge per scheme.

Filter by department. Search by name. Spot underperformance instantly – no PDF reading required

compare with budgets of different financial year

Total Allocation	Total Expenditure	Overall Utilization
FY2023-24₹9,200 Cr FY2026-27₹45,48,274.39 Cr ↑ 49337.8%	FY2023-24₹6,150 Cr FY2026-27₹45,48,274.39 Cr ↑ 73855.7%	FY2023-2466.8% FY2026-27100.0% ↑ 49.6%

Plain language in. Real answers out.

Ask Anything About Your Budget

A conversational AI trained on your uploaded document — answers with specific numbers and cites the source section.

❏ **Powered by OpenRouter API** — answers grounded in the actual document, not hallucinated.

→ "How much was spent on roads in 2023?"

→ "Which department had the highest expenditure?"

→ "Was the education budget increased from last year?"

We flag what politicians hope you never notice.

**Fund Utilization Anomalies**

Schemes where spending is suspiciously low — possible delays, cancellations, or diversions

AI Insight: Utilization is close to the under-utilization threshold, indicating potential for improvement in fund utilization.

Found 2 potential anomalies

**Zero Utilization**

Departments that received funds but spent ₹0.

"Urban Development — ₹450 Cr allocated. ₹0 spent. FY 2023-24"

**Unexplained Surge**

Allocations that doubled year-over-year with no policy reason.

"Special Projects Fund — allocation increased 340% from last year"

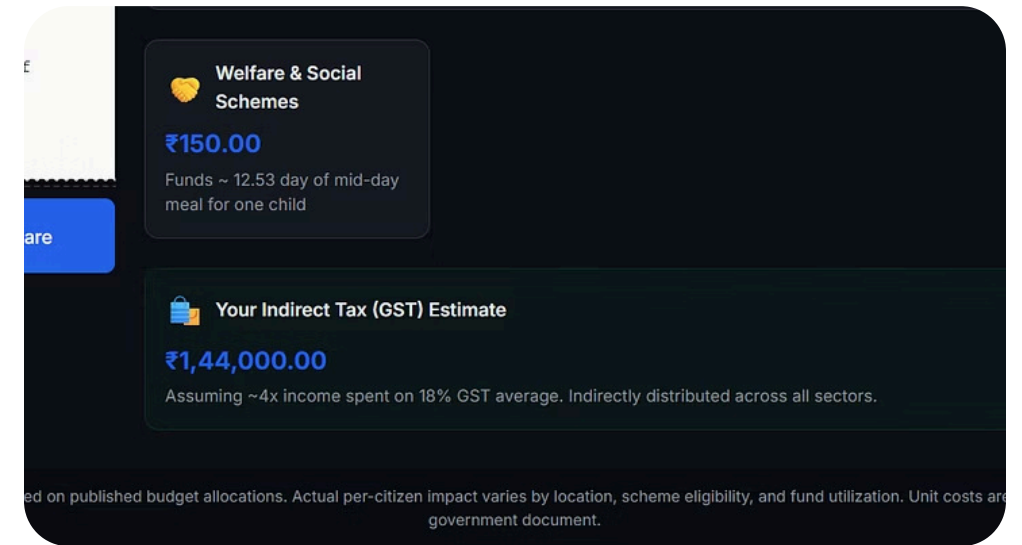

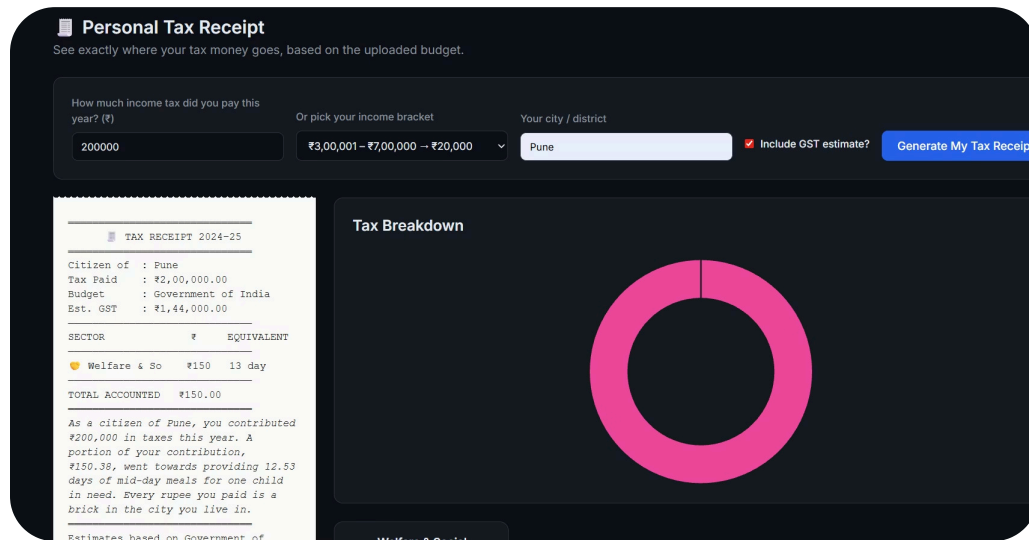

**March Dumping**

Last-minute budget releases in the final month of the fiscal year — a classic red flag for rushed, unaccountable spending.

"Anomaly detection turns a budget reader into a corruption detector."

Made with GAMMA

See what changed. Then see your personal stake in it.

FEATURE 6

What changed year over year?

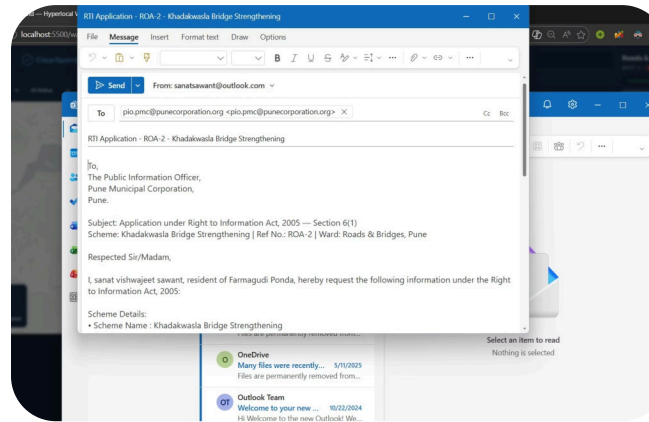

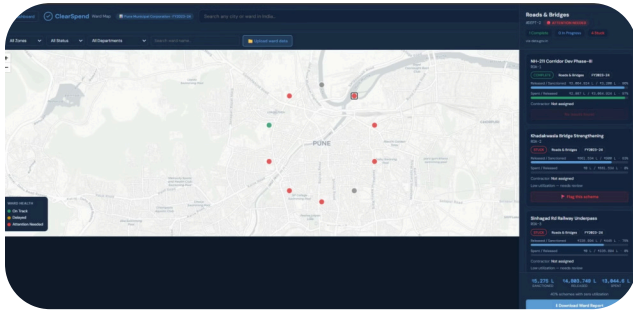

Upload two PDFs. AI diffs them instantly — showing exactly what increased, decreased, or disappeared between fiscal years.

You paid ₹2,00,000. Here's what it built.

Enter your annual tax. See your human-scale share of every rupee — rendered as a personalized thermal receipt.

Ground Reality Map

What it does Type your city → see every funded project on a live map.
Green = on track · Amber = delayed · Red = never started.

Click any ward to see:

- How much was sanctioned, released, and actually spent
- The contractor responsible
- The exact reason for delay — in plain language

Spot something suspicious? One click generates a ready-to-send RTI application under the RTI Act 2005 — pre-filled with scheme name, amounts, contractor, and the right question to ask. You just add your name and address.

Your city not covered? Upload your own CSV or JSON — the tool maps it instantly.

Built for 1.4 billion taxpayers who deserve better.

The Problem We Solve

- Budget opacity breeds corruption
- Citizens are excluded from civic data
- No tool exists for non-expert budget analysis

What ClearSpend Does

- Makes any budget PDF queryable in minutes
- Connects government claims to ground reality
- Shows every citizen their personal stake

What's Next

- RTI auto-draft from anomalies
- Multilingual support — Hindi, Marathi, Tamil
- Integration with state and municipal portals

"Every rupee you paid is a brick in the city you live in."
